### Notes

- Review the Episode Guide in Teacher's Handbook 1 for additional teaching suggestions and activities.
- Before each day, review the annotated teacher versions of each component you will be using.
- Repeat this schedule for *each* episode you use.
- Follow the sequence outlined above, regardless of whether you do all five sessions in a single week or over a longer period of time.
- Toward the end of each week, try to give students some "catch-up time" to be sure all components for that week have been completed.
- Refer to this planner if you are using Handbooks 1 and 2 for summer school.
